HEADS, I WIN!

This challenge tests your understanding of the RAND() function and IF-ELSE statement.

You need to generate a random number between 1 and 2.

If the random number is 1 then echo "Heads, I win!"

If the random number is 2 then echo "Tails, you win!"

EXTENSION

This extension challenge tests your understanding of:

- RAND()
- IF-ELSE
- FOR loop
- concatenation

Use a loop to generate the above 100 times. Keep a score of how many heads there were and how many tails and then echo out the results as:

There were 48 heads and 52 tails.

(obviously the numbers will be generated by the script!)
